

feynman s lost lecture david goodstein judith r - *this is an awesome explanation of newton s proofs that were the foundation of modern math and physics every physics student can benefit from this kind of fundamental explanation of the universe, **what causes the greenhouse effect roy spencer phd** - given the same amount of absorbed solar energy coming in the amount of ir escaping to space at the top of the atmosphere will indeed be the same no matter how many greenhouse gases there are assuming the system is in equilibrium, **did cosmos pick the wrong hero out there** - along with his translations digges added commentary and new ideas making it clear that the copernican model was more than philosophy it was a physically real model of the solar system*
